## 2017 Audiologist & Speech-Language Pathologist Workforce Reports

---

The Virginia Department of Health Professions' Healthcare Workforce Data Center (DHP HWDC) is pleased to announce the 2017 editions of the Audiologist & Speech-Language Pathologist Workforce reports.

These reports include findings on key practitioner and practice characteristics related to demographics, education, student debt, workforce settings and roles, income and benefits, job satisfaction, work time allocation, future plans, and more. Given the standard methodology, the data are comparable within and across professions, within policy-relevant regions, and across renewal cycles over time.

---

DHP HWDC was established in 2008 to improve data collection and measurement of Virginia's healthcare workforce. With guidance from over 100 stakeholders, DHP HWDC developed standard surveys for the health professions and administers them through the respective profession's online license renewal processes. At the end of each renewal cycle, the data are analyzed and published in the profession reports.

Please note *all* DHP HWDC current and archived publications are available through the main webpage at [HWDC](#). In addition to the publications discussed above, there are additional "Data Products" that also describe statewide and regional healthcare workforce trends and enable comparisons within and across professions and over time.
